# WLUCTSTUD

## WLUCTSTUD

is the name of the wireless network at the University of Catania allowing students and PhD students to access Internet and the online services by mean of any device provided with a wifi board.

Università  
degli Studi  
di Catania

## Service Features

The Wi-Fi Hotspots provide online services to classrooms, study rooms, lecture halls, libraries and other indoor and outdoor spots usually attended by students.

Thanks to the potentialities offered by the broadband network of the University of Catania all the current online services are easily and quickly accessible, and new ones could be implemented.

Università  
degli Studi  
di Catania

## Service set-up

The access points are configured in such a way to ensure users' mobility within all the facilities and areas where the service is supposed to be active.

At the Wireless Service Address

<http://www.unict.it/it/servizi/configurazionewifi>

you'll find further informations about wifi setup on devices.

The Service Set Identifier (SSID) of the  
*wireless network* is **WLUCTSTUD**.

Università  
degli Studi  
di Catania

## Access to WLUCTSTUD

### General parameters for service set-up

To access WLUCTSTUD network a set of credentials is required.

**Username = Your italian Tax Code (Codice Fiscale)**

**Password = PIN**

Università  
degli Studi  
di Catania

SSID network name	WLUCTSTUD
Security mode	WPA-Enterprise (sometime WPA)
Data cryptography	AES or TKIP
Credentials	<b>Username: <i>tax code</i></b> <b>Password : <i>PIN</i></b>

Università  
degli Studi  
di Catania

## Access to EDUROAM

The University of Catania participates in the **EduRoam** network, thus students belonging to institutions taking part to the same network will be able to connect to our wireless service through the "**EDUROAM**" SSID using their own credentials, without the need of further formalities at the hosting institution.

Università  
degli Studi  
di Catania

## Access to EDUROAM

The technical features of the wireless connection offered by Eduroam are alike those of WLUCTSTUD; the only difference is that the identifier of the wireless network to connect to is EDUROAM, and the credentials to use are the same, just need to add to the username “@ + the belonging institution’s domain” (es: [username@unict.it](mailto:username@unict.it)), and the given password.
